

**Capability Development Activities of Center for Ecological Aquaculture(CEA) 2022 Lancang -
Mekong Rice-Fish Training Program(Online)**
Nov. 5-7, 2022

1. Introduction of the Program

The Food and Agriculture Organization (FAO) and Shanghai Ocean University (SHOU) have historically collaborated closely on research and development activities in support of their common objectives for sustainable aquaculture as part of a Blue Transformation that supports biodiversity, facilitates ecosystem restoration and the delivery of ecosystem services, strengthens climate change mitigation and adaptation and builds resilience to stressors, and that relates to the enhanced mainstreaming of agroecological principles to improve food and nutrition security, the conservation and management of natural resources and poverty reduction in developing countries. Examples include inter alia the joint successful organization of the Global Conference on Aquaculture Millennium +20 (GCA +20) and successful holding of two International Symposia on Integrated Rice-Fish Farming.

In order to enhance their support to ecological aquaculture and an Ecosystem Approach to Aquaculture, FAO and SHOU work through the Center for Ecological Aquaculture (CEA) with a goal to achieve global reach in the transition of global aquaculture production towards more sustainable, carbon-neutral and ecologically sensitive methods that promote ecologically sensitive practices and environmental conservation.

Shanghai Ocean University (SHOU) is one of the most influential centers of rice-fish research and education in China. Rice-crab model (Panjin), Crab-rice model (Chongming), and rice-carp model (Qintian) models have been developed in Shanghai Ocean University and applied to many areas of China since then, which has made great economic and social success. The Capability Development Activities of Center for Ecological Aquaculture(CEA) “Lancang-Mekong Rice-Fish” Training Program aims to help establish local-adapted rice-fish models in Lancang-Mekong countries through collaboration, to mitigate poverty, provide food security, meet the nutrition demands of the locals and educate local experts.

2. Program Fee

Full tuition waiver

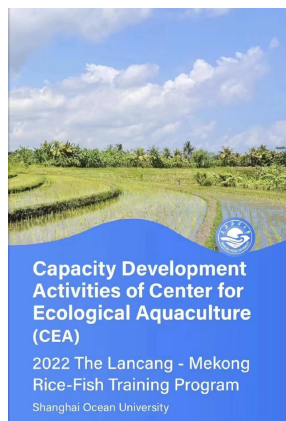

3. Application Deadline:

Oct. 28, 2022

4. How to apply?

Register at <https://www.wjx.cn/vm/YyaskRB.aspx>, complete the application form and submit. You will receive a confirmation email before the program begins if your application is accepted.

More specific information to the program is attached. Please check the file: **Capability Development Activities of Center for Ecological Aquaculture(CEA) 2022 Lancang-Mekong Rice-Fish Training Program.**

Shanghai Ocean University offers 2023 full scholarship to outstanding international students who want to study the Ph.D program in the field of aquaculture. The participants of this program will have the chance to receive the prospective supervisor's recommendation letter!

Should you have any question, you may email to admissions@shou.edu.cn, or make a call to 0086-21-61900763, or add admission officer Ms. Louise's contact from Facebook: <https://www.facebook.com/louise.shi.7/> or Wechat below.
