SHANGHAI OCEAN UNIVERSITY

MARINE CULTIVATION AND FISHERIES 耕海牧渔
INTERNATIONAL SUMMER SCHOOL

2025

HOST INSTITUTION:

COLLEGE OF FISHERIES AND LIFE SCIENCES
SHANGHAI OCEAN UNIVERSITY

Shanghai Ocean University is a multidisciplinary, applied research-oriented higher education institution with a focus on aquaculture and fisheries. The university is listed under the national 'Double First-Class' initiative, committed to the sustainable development and utilization of aquatic biological resources and ecological protection of the earth's environment.

The College of Fisheries and Life Sciences is the principal unit of Shanghai Ocean University to undertake the national 'Double First-Class' construction task. The mission of College of Fisheries and Life Sciences is to conduct cutting-edge research and to provide top-notch education in aquaculture and aquatic biology.

PROGRAM OVERVIEW

The ocean, the blue heart of the Earth, nurtures the infinite possibilities of human civilization with its vastness and abundance. Covering 71% of the Earth's surface, the ocean harbors rich biological resources and serves as a vital treasure trove for future food supply. The 135 billion tons of organic matter produced annually by the ocean have a potential food supply capacity a thousand times greater than that of land, providing a precious source of high-quality protein for humanity.

"Marine Cultivation and Fisheries" is not only a production activity but also a profound reflection and planning for the future. Building a "blue granary" and "future granary" is of strategic significance for China, with its population of over 1.4 billion, as well as for the global diversified food supply system. As the world's largest producer of aquatic products, China accounts for 80% of its total output from aquaculture and contributes 40% of the global aquaculture production. This not only demonstrates China's leading position in the field of aquaculture but also provides valuable technological and experiential resources for international exchange.

This program, leveraging the disciplinary strengths and international collaboration experience of Shanghai Ocean University, is themed around "Marine Cultivation and Fisheries." It features a series of lectures, seminars, debates, and corporate visits, aiming to impart cutting-edge knowledge of aquatic biology to students from around the world, particularly those from Belt and Road Initiative countries. The program also showcases China's scientific achievements and practical experiences in modern fisheries. Through this program, we aim to promote innovative development in the aquaculture industry, exploring the mysteries of the ocean, and fostering deeper cultural understanding and recognition.

PROGRAM DETAILS

A

PROGRAM DETAILS

22th June – 11th July 2025

B

LOCATION:

Shanghai Ocean University (Lin-gang Campus)

C

LANGUAGE OF INSTRUCTION:

English

D

COURSE HOURS:

9:00 AM - 12:00 PM, 2:00 PM - 5:00 PM

PROGRAM HIGHLIGHTS

FEES & SCHOLARSHIP

As a scholarship program financed by Shanghai government and SHOU, fees including tuition, accommodations and course materials will be fully covered. The international transportation fees and visa application fees are excluded, which need applicants to pay themselves .

APPLICATION

APPLICANT ELIGIBILITY

Non-Chinese citizens in good health

Students and young scholars who are interested in aquaculture

IELTS (Academic) score of 6.0 or above, or TOEFL score of 80 or above; Or other internationally recognized English proficiency tests with equivalent scores; The native or official language is English or the applicants who have obtained a degree from English speaking countries

APPLICATION DEADLINE

11 APRIL, 2025

APPLICATION PROCEDURE

A

Scan the code and complete the form

B

Upload the required documents
